

FOR EMPLOYERS

Courses for your team

Buy seats for your staff in one go, at a lower price per person.
You get individual codes to hand out — no need to create
accounts for them or manage their passwords.

lessons

YOU TYPE THIS

Make a quiz about films, with big buttons and a
score at the end.

Claude builds the app

Why Apptimate Academy

Short and to the point

Lessons of a few minutes, in plain language and with examples from real working life. Not a translated American course.

At their own pace

No fixed date, no meeting room, no travel. Everyone starts when it suits them and picks up where they left off.

A certificate each

Anyone who completes every lesson gets a personal certificate with a unique code. Useful when an auditor or insurer asks for one.

How it works

From order to finished course, without you managing accounts or passwords.

- 1 Pick a learning path and the number of seats, and pay.
- 2 You immediately receive as many licence codes as you bought seats.
- 3 You hand out the codes. Each employee creates their own account and redeems their code.
- 4 A code nobody has used yet can still be given to someone else. Once it is redeemed, the access stays with that person — including after they leave the company.

Want to know who has finished? Just ask and we will send you an overview. A screen of your own for that is something we will build once enough people want it.

What we offer

13 courses: 3 learning paths that build on one another and 4 standalone courses on a single topic. All of it in Dutch and English.

LEARNING PATH

Building apps with AI

Courses that build on each other — from beginner to professional. Take them one by one or as a discounted bundle.

01 Vibe Coding for Beginners

Build your own apps with Claude — without ever having programmed

7 modules

21 lessons

approx. 6–8 hours

02 Vibe Coding 201 — Databases, APIs and authentication

From loose little apps to one real tool that remembers your data

7 modules

21 lessons

approx. 8–10 hours

03 Vibe Coding 301 — AI Agents, automation and workflows

Let software carry out tasks itself — from smart assistants to automatic workflows

7 modules

21 lessons

approx. 8–10 hours

04 Vibe Coding 401 — Building SaaS, deployment and revenue models

From your own tool to a real online product that others pay for

7 modules

21 lessons

approx. 8–10 hours

05 Vibe Coding Expert — Architecture, security, testing and scalability

From a working product to professional, reliable and ready for growth

7 modules

21 lessons

approx. 8–10 hours

LEARNING PATH

Staying safe online

Short, practical courses that make you and your team resilient against phishing and account takeover. Take them one by one or as a discounted bundle.

01 Recognising and preventing phishing

Practical resilience against phishing — for teams and at home, in the age of AI

5 modules

15 lessons

approx. 2 hours

02 Passwords, 2FA and account security

Actually locking down your accounts — without it getting in the way of your day

6 modules

18 lessons

approx. 3 hours

LEARNING PATH

AI at work

Courses that build on each other — from beginner to professional. Take them one by one or as a discounted bundle.

01 AI at Work

What you enter, what you keep out, and how to tell whether the answer is right

5 modules

15 lessons

approx. 2-3 hours

02 Business Writing with AI

Emails, quotations, reports and public texts — faster, and still in your own voice

6 modules

18 lessons

approx. 3-4 hours

STANDALONE COURSES

Standalone courses

Self-contained courses on individual topics — not a learning path.

01 Databases and SQL

From zero to writing your own queries — retrieve, combine and manage data with SQL

6 modules

18 lessons

approx. 4-5 hours

02 Git and version control

No more 'project-final-v2-really-final' — keep your work safe, undo anything, share it with anyone

6 modules

18 lessons

approx. 4-5 hours

03 Working with APIs

Tying systems together — fetching data, sending data, and integrations that keep working

6 modules

18 lessons

approx. 4-5 hours

04 UX and design — why it works but does not feel right

Getting your app finished is one thing; making it look professional is something you can learn

6 modules

18 lessons

approx. 3-4 hours

Each learning path can also be bought as one complete bundle — including the courses added to it later, at no extra cost.

In short

What you get from us, and what you have to arrange yourself.

- ✓ Every course in both Dutch and English.
- ✓ At their own pace — no fixed date, no meeting room, no travel.
- ✓ Practical assignments and self-tests in every module.
- ✓ A personal certificate with a unique code on full completion.
- ✓ Licence codes you hand out yourself; you manage no accounts or passwords.
- ✓ A code nobody has redeemed yet can still be given to someone else.
- ✓ The Building apps with AI path needs nothing but a free Claude account.
- ✓ On request we send you an overview of who has finished the course.
